B.Tech, Computer Science & Engineering, Government Engineering College, Ajmer | 2022 – 2026 | CGPA: 7.45 / 10

PROFESSIONAL SUMMARY

Java Backend Developer (B.Tech CSE, 2026) at MYITMATE, deployed with the IT team at the National Informatics Centre (NIC) on the Municipal Corporation of Delhi (MCD) Health Trade License platform. Hands-on experience building and supporting production applications with Java, Spring Boot, Spring MVC, RESTful APIs, Hibernate/JPA and PostgreSQL. Delivered systems used by 5,000+ government officials and 1,000+ active users. Strong in SDLC, debugging, root-cause analysis, CI/CD and Agile workflows; 700+ LeetCode problems solved.

PROFESSIONAL EXPERIENCE

Java Developer | MYITMATE **Jun 2026 – Present**

NIC IT Team, Municipal Corporation of Delhi (MCD) | Health Trade License (HTL) System

- Develop and maintain production modules of the HTL e-Governance system covering licensing, document verification, inspections, validations and multi-stage approval workflows using Java, Spring MVC, Hibernate/JPA and PostgreSQL.
- Refactor Spring MVC controllers and optimize SQL queries to improve application performance, reliability and maintainability.
- Own features end to end, from requirement analysis and development to testing and deployment support; resolve production issues through root-cause analysis.

Full Stack Developer & DevOps Engineer | MOON Startup **Aug 2025 – Jan 2026**

- Owned end-to-end development and deployment of 3 web applications serving 1,000+ active users, from backend REST APIs to releases, monitoring and troubleshooting.
- Integrated Razorpay payments, Google OAuth 2.0 authentication and SMTP email notifications for secure, customer-facing workflows.
- Managed CI/CD pipelines (GitHub Actions), Linux servers, Nginx and SSL for reliable, repeatable deployments.

Java Full Stack Developer Intern | National Informatics Centre (NIC), MeitY **Jun 2025 – Jul 2025**

- Developed the Honorarium Management System for 5,000+ government officials using Java, Spring Boot, Spring MVC, JPA/Hibernate, PostgreSQL, Thymeleaf and AJAX, with role-based access control (RBAC) and approval workflows.
- Reduced manual processing effort by ~40% by digitizing approval and transaction-processing flows with server-side validation and asynchronous form handling.

PROJECTS

HTL-2 – Health Trade License Portal (Live, MCD) | *Java, Spring MVC, Hibernate/JPA, PostgreSQL, JSP* **Jun 2026 – Present**

- Contribute to a live, production e-Governance application of the Municipal Corporation of Delhi (MCD) with active users, as part of the MYITMATE team deployed at NIC; 280+ Java classes and 15+ Spring MVC controllers.
- Documented ~90 REST API endpoints and prepared technical handover documentation to improve maintainability, knowledge transfer and team onboarding.
- Identified security and code-quality risks (hard-coded credentials, weak hashing) and flagged them for remediation as part of production support.

ContextBridge – AI Context Transfer Extension | *JavaScript, Chrome Manifest V3, AICP v1.0* **Aug 2026**

- Designed, built and published a Chrome extension (live on Chrome Web Store) with a custom AICP v1.0 protocol to extract, sanitize, validate and transfer conversation context between AI platforms.
- Applied modular architecture, provider abstraction and asynchronous event handling so new AI platforms can be added easily.

ACHIEVEMENTS & HIGHLIGHTS

- **Patent:** Bluetooth Anti-Theft System, Indian Patent No. 202411093785 A.
- **Chrome Web Store:** Published ContextBridge, a Manifest V3 extension approved for public release.
- **DSA:** Solved 700+ Data Structures & Algorithms problems on LeetCode.
- **Open Source:** GirlScript Summer of Code (GSSoC) 2025 Contributor.
- **Certifications:** Oracle MySQL (Oracle Learning Explorer); Analysis of Algorithms (Princeton, Coursera); Java Full Stack with Spring Boot (Udemy).

TECHNICAL SKILLS

Languages: Java, JavaScript, TypeScript, Python, SQL, C/C++

Backend & Frameworks: Spring Boot, Spring MVC, Spring Security, Microservices, RESTful APIs, JPA/Hibernate, JUnit

Databases: PostgreSQL, MySQL, MongoDB, SQL Query Optimization, Schema Design

DevOps & Tools: Git, GitHub Actions (CI/CD), Docker, Linux, Nginx, Maven, Postman, Swagger

Core Concepts: OOP, Data Structures & Algorithms, Design Patterns, System Design, SDLC, Agile, Unit Testing, Code Review

Frontend & Integrations: JSP, Thymeleaf, HTML/CSS, AJAX, Razorpay, Google OAuth 2.0
